## Guardian Pool Fencing - Height 1.2 metres plus

Fence World offers the widest range of swimming pool or spa pool fence styles designs. Whether you have strict budget guidelines or are looking for a unique architectural style, Fence World will deliver a pool fence that will be safe, strong, look great and comply with all council regulations.

and

Guardian Poolsafe fencing has clean, simple lines and is built tough in New Zealand to withstand the rigours of our climate and everyday use.

Our Guardian Poolsafe fence systems are made strong from high quality tubular aluminium, galvanised steel or glass and come with a full five year warranty. Our extensive range of high quality latches and closing systems are council approved and offers everyone the best peace of mind.

With over 200+ Powder coat colours to choose from & customised panels to suit contours, we can meet every design need. Where the view is impressive, we offer the in frameless glass panel barriers and Balustrades. As fencing specialists we handle all aspects of installation and can project manage the entire job from start to delivering on time & budget.

finish,

### Applications

- Decks
- Spa pools
- Swimming pools
- Apartment Verandas
- Handrails & Balustrades

### Guardian Poolsafe Fences ensures Peace of Mind

## Landscape Fencing - Height 1 metre plus.

Landscape Fences are a vital part of a property's beauty and charm. Fence World's attractive landscape fencing will add extra dimensions to a property by either creating unique spaces or screening out prying eyes & unattractive outlooks. Our Landscape Fencing can define a secluded area for entertaining or border a children's play area or segment garden themes. Discrete landscape fences will add security to hedges to keep out intruders & keep in pets, they can also hide unsightly bins, gas cylinders or air conditioning units to further enhance a property's looks.

Exciting design options allow you to use Wire for economy projects to keep people out; Steel for Safety, Strength & Security; Aluminium for Seaside & Ornamental design projects or Glass where the view is paramount.

Choose from our extensive range of designs, materials and 200+ architectural colours or we can manufacture and install whatever you want; because with Fence World the possibilities are endless.

### Applications:

- Boundary fences
- Screens
- Garden borders
- Pergolas
- Streams and ponds
- Graveside borders

**A lifetime investment ensuring enjoyment for today & resale value for tomorrow**

## School and Kindergarten - Height 1.6 to 1.8 metres

School & Kindergarten fences are an essential element of keeping our children and school property safe. Fence World offers an economical yet attractive solution for Schools, Kindergartens, Day-Care Centres and Retirement Villages. The great range of styles, colours and heights can suit all applications. The fencing is strong enough to withstand years of kids everyday rough & tumble playground action. Fence World produces gates to suit the fences and can supply custom made locks, latches and access control options to fit each application.

With our wide experience and industry knowledge, we project manage and install the entire job and can offer a programmed maintenance service to keep the fence in perfect condition.

Find out why Fence World is the popular choice for school fencing by contacting us today.

### Applications

- Schools
- Kindergartens
- Day-care centres
- Colleges
- Retirement Villages

**Keeping Our Children Safe**

**Safety, Security, Style**

## Sports Ground Fencing - Height 3 to 8 metres

Sports activities can be very demanding on fencing. Our Sports Ground fences are designed and installed to withstand any amount of sports ground action and to keep the ball in play.

Fence World is highly experienced in constructing and installing sports ground fencing that is not only matched to the unique demands of each sport but also looks good.

We will install & project manage the entire job to ensure that everything comes together on time, on budget and within council regulations.

Fence World can also offer maintenance contracts to ensure the fence is kept in top condition year after year.

Contact us today for a design consultation.

### Applications

- Golf courses
- Tennis courts
- Cricket pitches and practice nets
- Netball courts
- Baseball and softball diamonds
- Rugby, hockey and soccer grounds
- Club rooms

**Fencing to keep the ball in play**

## Enclosure Fencing 1.2 to 5 metres plus

Fence World enclosure fencing can be used for secure storage, aviaries, dog runs or special cages for zoos, vet clinics, kennels, catteries and lifestyle blocks. Fence World has the knowledge and experience to design and build enclosures that will stop risk of escape or injury and prohibit entry of predators. Specialist predator proof fencing to meet any need can be custom built & installed.

We can install access control and security systems to ensure the security of valuable animals. As specialist manufacturers we build to exact requirements and manage the entire project from design to completion. To ensure the enclosure remains in perfect condition, we offer inspection and maintenance contracts.

Contact Fence World today to discuss your needs.

### Applications

- Aviaries
- Dog runs
- Goat Farms
- Deer Farms
- Hobby farms
- Ostrich Farms
- Transport cages
- Kennels & catteries
- Predator proof fencing
- Zoos and petting farms

**Keeping Pets together & Predators apart**

## Pipe & Mesh Chainlink Fencing - Height 1.5 metres plus

Pipe & Mesh Chainlink fencing is a popular, proven & cost effective fencing solution for industrial, commercial & leisure applications requiring moderate levels of general security. Chainlink mesh for fencing, woven from steel wire, is probably the most widely used and versatile of all fencing fabrics, available in a variety of wire gauges and mesh sizes to suit specific applications.

Available in three finishes, heavily galvanised, P.V.C coated with a bright core or for double protection, P.V.C coated with a galvanized wire core.

For added security and strength, extra cross rails, high security mesh, barbed wire, razor wire or electrification can be added.

As specialist fencing manufacturers we build to exact requirements and manage the entire project from design to completion. To ensure the enclosure remains in perfect condition, we offer inspection and maintenance contracts.

Applications

Parks

Schools

Tennis courts

Industrial sites

Sports facilities

**14 years of NZ experience & customer satisfaction**

**A timeless, proven & traditional fencing staple.**

## Palisade Security - Height 1.8 to 2.5 metres

Perimeter Security demands unique security fence measures to deter aggressive intruders. The Fence World Guardian Palisade Security fence offers exceptional resistance to bending and deformation – ideal where high security is required or where vandalism is a threat. The triple-pointed paling tops have a scallop shape & combined with the internal folded rib are designed to offer maximum strength to prevent intruders from gaining access to – and removing – the high tensile “T” head fasteners.

This new Generation Guardian Palisade Security fencing follows the profile of sloping ground which overcomes the need for ‘stepping’ – so avoiding the creation of potential security gaps below the fencing. This fence is easy to specify as it is available in a range of heights with matching swing gates and sliding gates – electrically operated if required.

For the ultimate solution in security, barbed wire, razor wire or electrics can be added.

### Applications

- Industrial property
- Storage facilities
- Distribution centres
- Car yards
- Truck yards
- Compounds
- Stadiums
- Border fencing
- High risk sites
- Graffiti prone sites

**New Generation Perimeter Security with Versatility, Long Life & Good Looks.**

## Custom Projects - Design, Build & Install

Fence World has a wealth of experience and a well equipped engineering workshop set up for the fabrication of anything from small custom made brackets to large structures. Our qualified engineers will translate even the most basic sketch into reality, specifying the correct materials and making sure it will both work properly and last a lifetime. We manage projects, working with all the other tradesmen to ensure the job is completed on time, within budget and to the client's satisfaction.

We employ tradesmen who are skilled in producing quality work and enjoy the challenge of building something different.

If you have ideas for something out of the ordinary, contact us today.

### Applications

- Balustrades
- Hand rails
- Barrier arms
- Fixed and removable bollards
- Security grilles

### Extraordinary is Ordinary for Us

## Staplelok Fencing System - Height 1.2 to 4 metres plus

Fence World is the home of the unique Staplelok fence system. Staplelok fence posts are roll-formed in our factory from locally made tough high tensile galvanised steel and exported around the world.

Staplelok's versatility, high strength and simple installation make it the first choice for wire, mesh and electric security fencing. Staplelok posts can be manufactured to any length and using the range of custom made clip-in accessories, can be used in almost any situation.

Staplelok fencing can be supplied with detailed instructions and all the components to install a complete fence gate solution in one package.

We have examples of Staplelok fencing at our showroom and provide specifications and application advice for all situations.

### Applications

- Sheep and cattle fencing
- Deer fencing
- Wire fencing
- Mesh fencing
- Electrified fencing
- Trident palisade fencing
- Vineyard post systems
- Passive security
- Anti graffiti barriers

### A Complete Fencing System in a Post

## Z47 Vineyard Trellis System

The unique Z47 vineyard trellis system was developed and manufactured by Fence World. Using our industry knowledge, the Z47 galvanised steel post has been developed over many years specifically for New Zealand vineyard owners.

The advantages of the Z47 Steel post over the traditional wooden fence posts is their ease of installation, resistance to breakage and low maintenance. There is fewer disturbances to the ground and the protective galvanised surface is kinder on the environment than the preservatives used in producing timber posts. The posts are less likely to be damaged by harvesting machinery plus the carefully designed wire clips make it easy to secure the wires plus reduce long term wear and the possibility of wire breakage.

When properly installed, the Z47 post has been proven to exceed the strength requirements for high wind areas.

Contact Fence World for all the information you need on the Z47 vineyard trellis system.

### Advantages

- Easy installation
- Can be used over & over again
- Can withstand New Zealand's high wind strengths
- Flexes rather than snaps
- Does not leach toxins
- Friendly to harvesting machinery
- Easy to transport to site

## Residential & Driveway Gates

Controlling Entry & Exit from any premises has never been a higher priority than it is today. Fence World produces gates to accommodate entrances that demand gates as a main feature to enhance the stature of the surroundings and add to the value of the property. Less prestigious entrances will benefit from a practical gate design that will not impose on the boundary but will blend in with the perimeter.

Fence World can supply and install swing gates or sliding gates for any walkway, driveway or property. All gates are constructed in modern robust designs from Materials which will resist twisting & sagging. Choose from steel gates, unique ornate wrought iron gates or modern aluminium louver panel gates. We manufacture mechanisms to cope with the slope of your drive and will automate your gate for push button convenience and enhanced security. With our extensive experience we make sure that gates we install work properly. To ensure they work perfectly for a lifetime we offer programmed maintenance contracts.

Come and discuss your ideas with our knowledgeable and friendly team.

### Applications

- Residential properties
- Entranceways
- Lifestyle blocks
- Gated communities
- Retirement villages
- Pedestrian gates
- Pool gates

## Commercial & Custom-made Gates

Every fence needs a gate and Fence World has the widest range of gates to secure and enhance any property. From pedestrian gates to the largest industrial security gate we can design and manufacture a solution to fit your customer's requirements. We fabricate gates in steel or aluminium and can install opening mechanisms, latches and security systems. We can manage the whole project or co-ordinate with other trades to ensure trouble free installation. Fence World's years of experience means that our gates work as intended plus we also offer programmed maintenance schemes to ensure trouble free operation for life. Contact us for specifications and a quotation.

### Applications

- Industrial gates
- Farm gates
- Security gates
- Automated sliding gates
- Automated swing gates
- Cantilevered gates

## Gate Automation

Gates need to open and close reliably and withstand all the forces that nature throws at them. We use the latest designs in automation systems which incorporates extra safety features such as infra-red safety beams and vehicle detection loops.

For sliding gates we use quality rack and pinion drives and fit guide and support rollers to ensure smooth reliable operation.

For swing gates we have a wide range of actuators to suit each application from domestic pedestrian gates to double width driveways.

For cantilever gates with no ground track they provide high security and quick action movement in heavy axle load situations.

For additional security we can offer magnetic or electric locks and integrate your automated gates to security and access control systems.

Automation helps vehicle movement, and restricts access to approved persons.

Contact Fence World for our recommendations and specification sheets.

We install & project manages the entire job to ensure that everything comes together on time, on budget and within council regulations.

Our trusted brands include:

- MERLIN
- LIFTMASTER
- CHAMBERLAIN
- CARDIN
- MHOUSE
- PRATEL

Applications

- Residential driveways
- Warehouse and distribution centres
- High security areas
- Retirement villages
- Gated communities

Fence World can also offer maintenance contracts to ensure the fence is kept in top condition year after year.

**Safe secure saving time, yet controlling access security**

## Access Control

Fence World can integrate your fence system with the latest in security and access control. From simple key pad entry to sophisticated computerised systems including cameras, we have the solutions to suit every property. We can fit coded keypad entry systems or link up gate and garage door remote controls for the ultimate in convenience. Strong electro-magnetic clamps or electric locks can add extra security to gates and wired or wireless intercoms can be used to screen visitors. We can install entire systems or work with security companies to integrate with your network.

Contact Fence World for the latest specifications in access control equipment.

Our trusted brands include:

- MERLIN
- LIFTMASTER
- CHAMBERLAIN
- CARDIN
- MHOUSE
- PRASTEL

We install & project manages the entire job to ensure that everything comes together on time, on budget and within council regulations.

Fence World can also offer maintenance contracts to ensure the fence is kept in top condition year after year.

### Allowing access to those you want

## Electric Security Fencing

Our locally manufactured, internationally successful Staplelok fencing system is the perfect solution for adding the security of electrification to your premises. Electrified wires are easily placed behind a mesh fence or on top of fences, walls and roofs to deter intruders.

Fence World electric security fence systems are ideal for new installations but can also be retrofitted to add security to existing fences.

The New Zealand made high voltage energisers and control systems are of the highest quality and can be integrated with your security systems to warn of intrusion or tampering.

Our electric security products and installations comply with international standards for electric security fencing.

For worry free installation we will design and fit a complete electric security system for you.

### Applications

- High crime risk locations
- Secure storage facilities
- Rooftop security
- Military and government installations
- Industrial sites
- Vehicle dealers
- Utility and infrastructure facilities
- Graffiti control
- Prison and high security
- Commercial properties
- Valuable livestock protection
- If wire is cut, alarm monitoring ensures detection

**Dangerous looking & Too Hot to handle,**

## Design, Consult and Project Management

### Design and Consult

As manufacturers with a full engineering workshop, our strength is in providing unique designs for special situations. We will measure the site, discuss your needs and come up with a design that fits your precise requirements and budget.

Our design engineers are fully qualified and will ensure the finished products will work properly and comply with building regulations.

With our experience and expertise we frequently provide consultation to architects, designers, developers, and landscapers. We enjoy the challenge of designing and making products that put a unique touch to your client's property.

### Project Management

Leave the stress of installing your client's fence to us. Fence World can manage your project from start to finish. Our qualified engineers work closely with architects, designers and councils. We will communicate with all suppliers and contractors including builders, concrete layers, electricians and landscapers to ensure your fence and access way are installed on time, on budget and in perfect working order.

**Installation:** Our own staff will install to ensure quality and accurate detail to plans.

With our wide experience and industry knowledge, we install and project manage the entire job and can offer a programmed maintenance service to keep the fence in perfect condition.

**What you want, how you want.**

## Location and Ordering

Location and ordering: our steps for project completion

Fence World believes in doing things right first time. We take time to understand your needs and get the look you wish to achieve. In most circumstances we will come and measure the property to ensure what we make will fit.

- Phone, fax or e-mail us with your sketch, specifications, plans or detailed drawings or call in to discuss your design ideas in our showroom where you can see examples of our quality workmanship.
- We arrange an onsite consultation and measure
- We prepare a quote with full details
- We follow up for your decision
- We manufacture and install
- We photograph your fence & gate for our records
